

Carnival Point of Sale (POS) System

1. Project Overview

The Carnival POS System is a touch-based Point of Sale solution designed for carnival operations. The system provides fast billing, receipt printing, reporting, and administrative management. The system operates under the mandatory rule: One Activity = One Bill.

2. User Authentication

- Secure cashier login required
- Unique credentials for each user
- Secure user sessions

3. Activity Interface

- 13 main activities
- 2 additional categories (3 activities and 2 activities)
- Image-based touch buttons
- Tap to add activity to cart
- User-friendly layout

4. Dual Pricing System

- Each activity has two price types
- Toggle button to switch pricing mode
- Automatic price update when toggled

5. Billing Rules (Mandatory)

- One Activity = One Bill
- No combined billing allowed
- Multiple activities = separate printed bills

- Same activity multiple times = separate individual bills
- Billing only after payment confirmation

6. Receipt Requirements

Each printed bill must include:

- Carnival Logo
- Activity Name
- Price
- Unique Bill Number
- Cashier Name
- Date & Time

7. Daily Summary

Cashier can view:

- Daily total sales
- Total transactions
- Activity-wise breakdown

8. Admin Panel

- Add/Edit/Deactivate users
- Add/Edit/Delete activities
- Manage categories
- Manage dual pricing
- Upload activity images

9. Reporting System

- Full sales reports
- Activity-wise reports
- User-wise reports
- Daily/Monthly/Custom reports
- Historical data up to 2 years
- Export to PDF/Excel

10. Non-Functional Requirements

- Touch-screen optimized
- Fast performance
- Secure authentication
- Thermal printer support
- Windows POS compatibility
- Reliable database storage
